

Peter McCartney is the program director in the Division of Biological Infrastructure. He oversees research funded under several programs including Biological Databases and Informatics, National Ecological Observatory Network, Cyberinfrastructure for Environmental Observatories, Field Stations and Marine Laboratories, and Assembling the Tree of Life. Prior to NSF he was a Research Professor in the Global Institute of Sustainability at Arizona State University where he directed projects related to information systems for environmental and archaeological research; use of metadata for designing automated internet access to data and applications; and workflow processing tools for incorporating multiple models into comprehensive analyses.
