

GCE Mid-Term Review Schedule

(June 28-30, 2021)

Below is the schedule for the GCE review, to take place **June 28-30, 2021** with an initial briefing on Wednesday, **June 23**. We are planning a series of focused sessions, each with a group of relevant attendees (i.e. PIs, students, research techs). Sessions will include several short (10-15 minute) talks and we have also allotted time to go around the room so each attendee can explain their role. At the end of most sessions there are 25 minutes that can be used by the review team to ask questions and/or go into a private room to check in. We have also included time for an Executive Session at the end of Day 1, followed by a check in with the Lead PIs, in the event that the committee would like to request adjustments to the schedule. The presentations are distributed over 2 days, with day 3 reserved for writing the project report and a report out.

All times approximate!

June 28, 2021 (times are in EST)

11:00 – 12:10	Welcome; Overview of GCE project
